

Activity 1

```
<?php
echo "Name: Eloisa P. Manalo <br>";
print "Course: Bachelor of Science in Information Technology in short BSIT";
?>
```

Guide Questions:

1. What symbol is used to end a PHP statement?

The symbol to end a PHP statement is a semicolon.

2. Which is faster: echo or print?

Echo or echo is faster than print, because it does not return a value.

Act 2

```
<?php
echo "hi everyone!<br>";
echo "my name is Leon cris Malabanan.<br>";
echo " i am 18yrs old ";
?>
```

ACTIVITY 3

```
<?php
$name = "jenny bordeos";
$age = 24;
```

ACTIVITY 4

```
<?php
$name = "pablo mylene";
$age = 20;
```

```
echo "My name is " . $name . " and I am " . $age . " years old.";
?>
```

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

Task: Perform operation.

```
<?php
```

```
$a=10;
```

```
$b=3;
```

```
echo "Addition:" . ($a + $b) . "<br>";
```

```
echo "Subtraction:" . ($a - $b) . "<br>";
```

```
echo "Multiplication:" . ($a * $b) . "<br>";
```

```
echo "Division" . ($a / $b); ?>
```

```
</body>
```

```
</html>
```

ACTIVITY 6

```
<?php
```

```
$x = 5;
```

```
$x += 3;
```

```
echo $x;
```

```
?>
```

```
$x = $x + 3;
```

```
5 + 3 = 8
```

ACTIVITY 7

```
<?php
```

```
$a = 10;
```

```
$b = 5;
```

```
var_dump($a > $b);  
var_dump($a == $b);  
?>
```

MINI PROJECT

```
<?php  
$num1 = 8;  
$num2 = 4;  
  
echo "Sum: " . ($num1 + $num2) . "<br>";  
echo "Difference: " . ($num1 - $num2) . "<br>";  
echo "Product: " . ($num1 * $num2) . "<br>";  
echo "Quotient: " . ($num1 / $num2);  
?>
```

Sum: 12
Difference: 4
Product: 32
Quotient: 2
